CNT 5805 Final Project Preliminary Report

I. Project Team number (already assigned in WebCourses) and Project Title (you decide)

II. Project Member Names:
   a.
   b.
   c.

III. Briefly describe the data you want to analyze:
   I want to become familiar with your data as if I have never been exposed to your dataset. For example, what are your features/fields, what are you nodes and how do you plan to network them, approximately how many nodes and edges does it have, is it weighted, is it undirected or directed, what is the source of your data, etc.?

IV. Explain your motivation for analyzing this data:
   Why would you want to analyze this data? Do you have experience in this area of study?

V. Describe what specific research questions your analysis will address.

VI. Describe any data cleansing you plan to do.

VII. It is okay, but I want to know if you working with any entities outside (e.g., professors, businesses, universities, labs, governments) our classroom on this project? Please explain.

VIII. In submitting your Final Project Preliminary Report, you must upload this report into WebCourses Assignments under Project Assignments called **Final Project Preliminary Report** in *.pdf* format. Your file name should follow this naming convention: of your project, i.e., team number- project title-CNT5805-final project preliminary report.pdf. For example, *Team 7-JazzMusicians-CNT5805-final project preliminary report.pdf*

IX. Once your report has been approved and graded, you may proceed to the last steps in completing your project. Your project team number will have your project title appended to it in WebCourses. Since this is a WebCourses "group assignment", only one of your team members will have to submit this report as well as future uploads (final report and presentation). Everyone on your project team will receive the same grade.
